About the Academy

Dania Academy is a modern higher education centre, with international campuses in the cities of Randers and Viborg.

Dania was established on 1 January 2009 and has a long-standing tradition for developing and offering higher education, English-taught programs in the area:

- International Marketing
- Tourism and Hotel Management
- International Hospitality Management
- IT Technology
- Automotive Technology

Excellent facilities

Dania's Randers and Viborg Campuses are located in new and modern buildings. The Campuses offer excellent study facilities to its students, including the latest IT equipment and 24-hour access to the IT centre.

The Cities Randers and Viborg

Randers has some 65,000 inhabitants, making Randers the seventh-largest city in Denmark.

The city of Randers is big enough to have all the facilities an international student could want, but small enough to have retained its friendly atmosphere and is cheaper to live in than other major Danish cities.

Randers is well situated in terms of access to the rest of Denmark, just 35 kilometres from Denmark's second-largest city Aarhus and about 4 hours by train from Copenhagen, Denmark's capital. The Airport is only 50 km away.

The city of Viborg has 45,000 inhabitants and the whole municipality has 100,000. In medieval times Viborg was the capital of Jutland and the roman cathedral and the high court for West Denmark are reminiscences of the former clerical and juridical power of the town. Viborg also has a well preserved town centre where you will find many traces of the medieval town.

In Viborg exchange students will be at a very modern and internationally oriented campus which Dania shares with a large university college.

Conditions for Erasmus students

- Erasmus exchange students must attend all subjects of any given semester enrolled into. This is due to our multidisciplinary and group-work oriented approach to teaching. All absence from classes is registered (this is also the case for our full-time students). You cannot put together a study program consisting of modules from different semesters or programs.
- All exams, tests and projects of the semester(s) enrolled into **must** be taken. Exams at the end of the 2nd semester may also cover 1st-semester content.

Teaching methods

Dania uses a multi-disciplinary approach to teaching. The classes are a combination of discussion and group-work. Our lectures will not repeat what is written in books, but rather use textbook theories on case examples. This practical approach is also used while writing projects where the focus will be on how theories in fact are used in real life. Therefore, we are working closely with actual companies with solving concrete problems. This practical approach creates more value and hand-on experience for students.

It can take time to get used to our teaching methods. This, and the fact that most Erasmus students are not used to being taught in English, mean that most students that are in their 2nd or 3rd year at their home institution will still get ample challenges in our 1st or 2nd semester classes.

Important dates

Semester dates and holidays: see [Fact Sheet](#)

Programme overview:

Please note that the programme is organized in themes and that the individual subjects are incorporated in each theme. In the following, you will find descriptions of the themes and brief descriptions of the subjects belonging to each theme.

Theme 2: Market understanding

Content

The subject element is concerned with methods for analysing the company's external conditions and market potential. The focus is on customers and competitors, and this subject element also deals with the professional and social aspects of the company, the company's legal relationship and analyses of the company's supply chain.

Learning Objectives for market understanding

Knowledge

The student will gain knowledge about:

- different types of analyses to assess the company's external strategic situation,
- and an understanding of theory, methodology and practice in relation to different types of trend analyses and their relevance to the company.

Skills

The student will get the skills to:

- use the key methods and tools of the subject area in relation to an external analysis of the company's situation,
- evaluate practice-orientated issues as well as develop and select solutions in relation to the preparation of customer analyses and competitor analyses as well as evaluate the company's market potential,

- disseminate practice-orientated issues and possible solutions of the external situation to partners and users.

Competencies

The student will learn to:

- manage development-orientated situations related to the company's external strategic situation
- participate in academic and interdisciplinary collaboration with a professional approach in relation to the analysis of the company's external strategic situation, in a structured context, acquire new knowledge, skills and competencies in relation to the company's strategic situation in a given market.

Theme 2 – subject descriptions

International Marketing (5 ECTS)

- The marketing environment analysis
- Competitive industry structure
- Company capability profiles
- Benchmark analysis
- Consumer behavior including customer journey
- Consumer trends
- Marketpotential
- Analysis of the company's strengths, weaknesses, possibilities and threats

Economics (2 ECTS)

- National income accounting (value added, total demand and balance of payments)
- Cycle analysis and potential GDP
- Demographics
- Labour market and business structure

Organization and SCM (2 ECTS)

- Supply chain structure
- Supply chain optimization (value creation, logistic efficiency/strategy/coordination)
- Tools for optimizing value creation in SCM
- Managing the flow of goods (planning principles, inventory management, distribution etc.)
- Relationship, cooperation, selecting supply chain partners

Business law (1 ECTS)

- Contract law and consumer contracts

Theme 3: Market Analysis

Content

The subject element is concerned with methods of producing market analyses. There is a focus on data collection methods and the processing of data as well as legal issues related to this. Evaluation of data and statistical concepts and their application, as well as methods and tools for project management and control.

Learning Objectives for market analysis

Knowledge

The student will gain knowledge about:

- methods of collecting and using data and managing this,
- and an understanding of the practice, centrally applied theory and methodology in relation to different market analysis methods.

Skills

The student will get the skills to:

- use the subject's key methods and tools in relation to evaluating the validity and the reliability of the market analysis,
- assess the practice-orientated problems as well as outline and choose solutions based on the gathered primary and secondary data,
- disseminate practice-orientated issues and possible solutions within the field of market analysis to partners and users.

Competencies

The student will learn to:

- manage development-orientated situations by using relevant market analyses,
- participate in academic and interdisciplinary collaboration with a professional approach in connection with the preparation and presentation of recommendations based on a market analysis,
- in a structured context, acquire new knowledge, skills and competencies in relation to marketing analysis

Theme 3 – subject descriptions

International Marketing (4 ECTS)

- The marketing research process
- Primary- and secondary data collecting methods and forms of analysis
- Problem definition and design of analysis
- Internal sources and external sources
- Qualitative- and quantitative data collection methods
